

# THE PREFERRED VETERINARY IMAGING RETROFIT METHOD

# **Edge 1717**

17x17 Tethered DR Flat Panel Detector

- Pixel pitch: 140 µm
- Resolution: 3.9 lp/mm
- Fixed cassette sized No modifications
- · Auto triggering technology
- 1GB connection speed

# Designed to offer new levels of digital radiographic image quality without the need to modify existing x-ray equipment

#### 17x17 Tethered DR Flat Panel Detector

Edge 1717 was designed to allow users to experience the benefits of flat panel Digital Radiography in a cost-effective way.

Edge 1717 can be installed quickly and easily, eliminating the need to modify existing x-ray equipment. The detector is the same thinkness as a conventional film cassettes, making it easy to fit into a strandard cassette tray. Unlike traditional 14x17 inch CR cassette, the 17x17 inche detector improves flexibility when patient positioning without rotating it.

Edge 1717 features auto-trigger signal sensing technology which does not the need to integrate with a generator and efficiency was improved by streamlining workflow eliminating extra steps for use of film or CR. With less than 5 seconds of image preview time, patient throughput and overall productivity are improved and patient latency is reduced, providing an economical and ideal solution for x-ray diagnosics.

### **VetView** Acquisition Software

VetView is a complete image management software featuring easy data searching, fast image acquisition, and user friendly functions. These functions include image viewing, reprocessing, optimizing and archiving. It's intuitive and direct graphic user interface provides users simple access to patient history, image search, and case studies.

## (Specifications

CsI:TI
17 x 17 in.
18.1 x 18.1 x 0.6 in.
9.25 lb
423 x 423 mm
140 μm
3328 x 3328 pixels
14 bits
Max. 3.9 lp/mm
40 ~ 150 kVp
Ethernet 1 Gbps
